Design for kids – Made with care

FRANCK & FISCHER was started in 2005 by Annemarie Franck & Charlotte Fischer. During the years, children have been fascinated by the playful and safe products that stimulate their fantasy and curiosity.

The world of animals is close to our hearts. The essence of our designs reflects this, with graphic interpretations of different wonderful animals.

Every product is carefully designed by Annemarie with different shapes, textures and tactile surfaces to develop motor and sensory skills as the little ones play.

Since the beginning, sustainability and responsible production has been at the heart of FRANCK & FISCHER. All toys are made of natural materials, certified organic cotton, and FSC certified wood. They are tested carefully to ensure that they meet the highest health and safety European CE-standards.

We have a close and personal working relationship with our suppliers. This way, we can be sure that working conditions are good and that our products are made with love and care.

Browse and discover our universe where playfulness goes hand-in-hand with high quality and a modern Danish design.
